# A $\text{T}_{\text{E}}\text{X}$ and $\text{\LaTeX}$ Presentation

What is T<sub>E</sub>X and L<sup>A</sup>T<sub>E</sub>X?

# What is $\text{\LaTeX}$ ?

## LESLIE LAMPORT

- A set of markup commands created by Leslie Lamport to facilitate  $\text{\TeX}$ 's use.
- Doesn't require any knowledge of typography in general and  $\text{\TeX}$  particularly.
- Typographic and logical markup language used to set the text layout (like HTML).
- Cross-platform language, identical from one operating system to the other and extensible with packages.
- “*author-level program*”

L<sup>A</sup>T<sub>E</sub>X Document Creation Process

**HEC MONTRÉAL**

# Writing with a new perspective

- You write your document in plain text and you use commands to describe **what the text is** and **not what it should look like**.
- You focus on your **content**.
- You let  $\text{\LaTeX}$  do its work, that is taking care of the **container**.

# $\text{\LaTeX}$ Document Creation Process

# L<sup>A</sup>T<sub>E</sub>X Document Creation Process

# $\text{\LaTeX}$ Document Creation Process

# $\text{\LaTeX}$ Document Creation Process

visualization with an  
external reader

# Some Things Done Simply with $\text{\LaTeX}$ ...

... and not necessarily with a word processor

- Title page
- Table of contents
- Page numbering
- Figures and tables: display on a page, numbering, reference
- Equations: display, numbering and reference
- Citations and bibliographies
- Hyphenation
- Two-sided documents

# Tools you'll need

- A T<sub>E</sub>X distribution
  - T<sub>E</sub>X Live (Windows and Unix/Linux)
  - MacT<sub>E</sub>X, derived from T<sub>E</sub>X Live (Mac OS)
  - MiK<sub>T</sub>E<sub>X</sub> (Windows, Mac OS and Unix/Linux)
- An integrated writing environment
  - Too many to list them all. . .
  - The library uses and recommends T<sub>E</sub>XStudio
- A command line terminal

# The Basics

Document Structure

**HEC MONTRÉAL**

# Document structure

A  $\text{\LaTeX}$  document always has two parts:

```
\documentclass[11pt,french]{article}
\usepackage[utf8]{inputenc}
\usepackage[T1]{fontenc}
\usepackage{babel}
\usepackage[autolanguage]{numprint}

\begin{document}

  \section{Primo}

  Ac class dis donec erat facilisis magna mattis
  placerat potenti praesent primis sed tellus turpis
  ut vehicula. Ad amet eleifend eros fames habitant
  imperdiet integer laoreet leo magna magnis neque
  netus senectus taciti torquent.

  \section{Deuxio}

  Cursus dui egestas eget eros et hac magna massa mollis
  natoque penatibus sagittis sed tellus urna velit
  vestibulum vitae vulputate.
\end{document}
```

# Document structure

A  $\text{\LaTeX}$  document always has two parts:

```
\documentclass[11pt,french]{article}  
\usepackage[utf8]{inputenc}  
\usepackage[T1]{fontenc}  
\usepackage{babel}  
\usepackage[autolanguage]{numprint}
```

← Preamble

```
\begin{document}
```

```
\section{Primo}
```

Ac class dis donec erat facilisis magna mattis  
placerat potenti praesent primis sed tellus turpis  
ut vehicula. Ad amet eleifend eros fames habitant  
imperdiet integer laoreet leo magna magnis neque  
netus senectus taciti torquent.

```
\section{Deuxio}
```

Cursus dui egestas eget eros et hac magna massa mollis  
natoque penatibus sagittis sed tellus urna velit  
vestibulum vitae vulputate.

```
\end{document}
```

# Document structure

← Document body

# Preamble

## Document Class

The preamble's **first command** usually is the document class declaration.

```
\documentclass[options]{class}
```

# Preamble

## Document Class

The preamble's **first command** usually is the document class declaration.

```
\documentclass[options]{class}
```

## MAIN CLASSES

- article, book, letter, report
- memoir, **hecthes**
- slides, beamer, **hecppt**

# Preamble

## Document Class

The preamble's **first command** usually is the document class declaration.

```
\documentclass[options]{class}
```

### MAIN CLASSES

- article, book, letter, report
- memoir, **hecthes**
- slides, beamer, **hecppt**

### MAIN OPTIONS

- 10pt, 11pt, 12pt
- oneside, twoside
- openright, openany
- english, french

# Preamble

## Packages

Packages allow you to **modify existing commands** and to **add features** to the system. They are loaded in the preamble with the `\usepackage[options]{package}` command.

```
\documentclass[options]{class}  
  
\usepackage{package}  
\usepackage[options]{package}  
\usepackage{package1,package2,package3,...}
```

Each package's documentation can be found on the [Comprehensive T<sub>E</sub>X Archive Network Website](#).

# Commands

- Always begin with a \
- Three main forms:

```
\commandname[optional_args]{mandatory_args}  
\commandname*[optional_args]{mandatory_args}  
\commandname
```

- Mandatory arguments between { and }
- Optional arguments between [ and ]
- Commands without arguments: the command's name ends with any character that isn't a letter or with a blank space.
- A command's scope is limited between { and }.

# Environments

- Delimited by

```
\begin{environment}  
...  
\end{environment}
```

- An environment's content is treated differently from the remainder of the text.
- Changes apply only to the environment's content.

the 1990s, the number of people in the United States who are 65 years of age or older has increased by 50 percent, and the number of people 75 years of age or older has increased by 100 percent. The number of people 85 years of age or older has increased by 200 percent. The number of people 95 years of age or older has increased by 400 percent. The number of people 100 years of age or older has increased by 1,000 percent. The number of people 105 years of age or older has increased by 2,000 percent. The number of people 110 years of age or older has increased by 4,000 percent. The number of people 115 years of age or older has increased by 8,000 percent. The number of people 120 years of age or older has increased by 16,000 percent. The number of people 125 years of age or older has increased by 32,000 percent. The number of people 130 years of age or older has increased by 64,000 percent. The number of people 135 years of age or older has increased by 128,000 percent. The number of people 140 years of age or older has increased by 256,000 percent. The number of people 145 years of age or older has increased by 512,000 percent. The number of people 150 years of age or older has increased by 1,024,000 percent. The number of people 155 years of age or older has increased by 2,048,000 percent. The number of people 160 years of age or older has increased by 4,096,000 percent. The number of people 165 years of age or older has increased by 8,192,000 percent. The number of people 170 years of age or older has increased by 16,384,000 percent. The number of people 175 years of age or older has increased by 32,768,000 percent. The number of people 180 years of age or older has increased by 65,536,000 percent. The number of people 185 years of age or older has increased by 131,072,000 percent. The number of people 190 years of age or older has increased by 262,144,000 percent. The number of people 195 years of age or older has increased by 524,288,000 percent. The number of people 200 years of age or older has increased by 1,048,576,000 percent. The number of people 205 years of age or older has increased by 2,097,152,000 percent. The number of people 210 years of age or older has increased by 4,194,304,000 percent. The number of people 215 years of age or older has increased by 8,388,608,000 percent. The number of people 220 years of age or older has increased by 16,777,216,000 percent. The number of people 225 years of age or older has increased by 33,554,432,000 percent. The number of people 230 years of age or older has increased by 67,108,864,000 percent. The number of people 235 years of age or older has increased by 134,217,728,000 percent. The number of people 240 years of age or older has increased by 268,435,456,000 percent. The number of people 245 years of age or older has increased by 536,870,912,000 percent. The number of people 250 years of age or older has increased by 1,073,741,824,000 percent. The number of people 255 years of age or older has increased by 2,147,483,648,000 percent. The number of people 260 years of age or older has increased by 4,294,967,296,000 percent. The number of people 265 years of age or older has increased by 8,589,934,592,000 percent. The number of people 270 years of age or older has increased by 17,179,869,184,000 percent. The number of people 275 years of age or older has increased by 34,359,738,368,000 percent. The number of people 280 years of age or older has increased by 68,719,476,736,000 percent. The number of people 285 years of age or older has increased by 137,438,953,472,000 percent. The number of people 290 years of age or older has increased by 274,877,906,944,000 percent. The number of people 295 years of age or older has increased by 549,755,813,888,000 percent. The number of people 300 years of age or older has increased by 1,099,511,627,776,000 percent. The number of people 305 years of age or older has increased by 2,199,023,255,552,000 percent. The number of people 310 years of age or older has increased by 4,398,046,511,104,000 percent. The number of people 315 years of age or older has increased by 8,796,093,022,208,000 percent. The number of people 320 years of age or older has increased by 17,592,186,044,416,000 percent. The number of people 325 years of age or older has increased by 35,184,372,088,832,000 percent. The number of people 330 years of age or older has increased by 70,368,744,177,664,000 percent. The number of people 335 years of age or older has increased by 140,737,488,355,328,000 percent. The number of people 340 years of age or older has increased by 281,474,976,710,656,000 percent. The number of people 345 years of age or older has increased by 562,949,953,421,312,000 percent. The number of people 350 years of age or older has increased by 1,125,899,906,842,624,000 percent. The number of people 355 years of age or older has increased by 2,251,799,813,685,248,000 percent. The number of people 360 years of age or older has increased by 4,503,599,627,370,496,000 percent. The number of people 365 years of age or older has increased by 9,007,199,254,740,992,000 percent. The number of people 370 years of age or older has increased by 18,014,398,509,481,984,000 percent. The number of people 375 years of age or older has increased by 36,028,797,018,963,968,000 percent. The number of people 380 years of age or older has increased by 72,057,594,037,927,936,000 percent. The number of people 385 years of age or older has increased by 144,115,188,075,855,872,000 percent. The number of people 390 years of age or older has increased by 288,230,376,151,711,744,000 percent. The number of people 395 years of age or older has increased by 576,460,752,303,423,488,000 percent. The number of people 400 years of age or older has increased by 1,152,921,504,606,846,976,000 percent. The number of people 405 years of age or older has increased by 2,305,843,009,213,693,952,000 percent. The number of people 410 years of age or older has increased by 4,611,686,018,427,387,904,000 percent. The number of people 415 years of age or older has increased by 9,223,372,036,854,775,808,000 percent. The number of people 420 years of age or older has increased by 18,446,744,073,709,551,616,000 percent. The number of people 570 years of age or older has increased by 19,807,040,628,566,084,398,387,

# Writing

- You write your text in the document environment:

```
\begin{document}  
  The content of your document goes here ...  
\end{document}
```

- You write your document in plain text and use commands and environments to structure your text;
- You write your text like anywhere else:
  - Words are separated by one or more blank spaces;
  - Paragraphs are separated by one or more empty lines;
  - All extra white space is deleted on compilation.

# Reserved Characters

## T<sub>E</sub>X's Reserved Characters

- # Argument number in commands
- \$ Math Mode delimiter
- & Table column delimiter
- % Starts a comment
- \_ Indices (math)
- ^ Exponents (math)
- ~ No-break space
- { Opens a command or an environment definition
- } Closes a command or an environment definition

# Reserved Characters

## T<sub>E</sub>X's Reserved Characters

- # Argument number in commands
- \$ Math Mode delimiter
- & Table column delimiter
- % Starts a comment
- \_ Indices (math)
- ^ Exponents (math)
- ~ No-break space
- { Opens a command or an environment definition
- } Closes a command or an environment definition

### TO USE THE CHARACTERS:

\#

\\$

\&

\%

\\_

\textasciicircum

\textasciitilde

\{

\}

# Reserved Characters

- Quotation marks
  - The quotation marks " found on a keyboard are not used in typesetting.
  - Single ( ' ) or double ( " ) beginning marks and single ( ' ) or double ( " ) end marks are used to surround quotes.
- We type hyphens once ( — ), twice ( — — ) or three times ( — — — ) to produce hyphens, *en dashes* and *em dashes*.

# Document Organization

# Class Choice

The first thing you need to do when writing a  $\text{\LaTeX}$  document is to choose a document class.

Class	Divisions	Organization	Header	Footer
article	parts, sections, ...	one-sided	empty	centered page number
report	parts, chapters, sections, ...	one-sided	empty	centered page number
book	parts, chapters, sections, ...	two-sided	page numbers, titles	empty
hectthese	chapters, sections, subsections	two-sided	empty	centered page number

# Titles and Title Page

Automatic layout:

```
% Preamble commands
\title[short title]{long title}
\author[short author name]{long author name}
\date[short date]{long date}
[...]

% Document body command
\maketitle
```

Manual layout:

## STANDARD CLASSES

```
\begin{titlepage}
...
\end{titlepage}
```

## MEMOIR AND HECTHESE CLASSES

```
\begin{titlingpage}
...
\end{titlingpage}
```

In the **hecthes** document class, title pages are automatically generated.

# Abstract

- **article**, **report** or **memoir** classes : abstract generated with the abstract environment

```
\begin{abstract}  
...  
\end{abstract}
```

- **hecthese** class: french and english abstracts treated as normal, unnumbered chapters

# Sections

- The document is subdivided with the following commands:

```
\part[short title]{long title}  
\chapter[short title]{long title}  
\section[short title]{long title}  
\subsection[short title]{long title}  
  
\subsubsection[short title]{long title}    % avoid using in books  
  
\paragraph[short title]{long title}        % evil! never use!  
\subparagraph[short title]{long title}    % EVIL! never EVER use!
```

- Automatic numbering
- Commands followed by an \* = unnumbered section
- Short title as an optional argument

# Appendices

- Appendices are sections and chapters with an alphanumeric numbering (A, A.1, ...).
- Sections following the `\appendix` command are all considered appendices.
- In the title, “Chapter” is changed into “Appendix”.

# A Book's Logical Structure

book, memoir, hecthese classes

## `\frontmatter`

- preface, table of contents, etc.
- roman page numbering (i, ii, ...)
- unnumbered chapters

## `\mainmatter`

- the book's content
- arabic page numbering, starting at 1
- numbered chapters

# A Book's Logical Structure

book, memoir, hecthese classes

`\backmatter`

- everything else (bibliography, index, etc.)
- the page numbering continues
- unnumbered chapters

## Table of Contents and Referencing

**HEC MONTRÉAL**

# Table of Contents

- The table of contents is automatically generated with `\tableofcontents` .
- Needs **more than one** compilation to be generated.
- Unnumbered sections are not included.
- With the **hyperref** package, `\tableofcontents` generates the .pdf file's table of contents.

# Table of Contents

- The table of contents is automatically generated with `\tableofcontents` .
- Needs **more than one** compilation to be generated.
- Unnumbered sections are not included.
- With the **hyperref** package, `\tableofcontents` generates the .pdf file's table of contents.
- `\tableofcontents*` , from the memoir document class, doesn't include the table of contents in the table of contents.

# Table of Contents

- The table of contents is automatically generated with `\tableofcontents` .
- Needs **more than one** compilation to be generated.
- Unnumbered sections are not included.
- With the **hyperref** package, `\tableofcontents` generates the .pdf file's table of contents.
- `\tableofcontents*` , from the memoir document class, doesn't include the table of contents in the table of contents.
- `\listoffigures` generates the list of figures.
- `\listoftables` generates the list of tables.

# Labels and Automatic Referencing

Because your computer will do it better than you...

- **Never** refer manually to a section, an equation, a table, etc.
- “Name” an element with `\label`
- Refer to that label with `\ref`
- Needs 2 to 3 compilations to generate

```

\section{History}
As seen in Section \ref{sec:definitions}...
```

# Labels and Automatic Referencing

Because your computer will do it better than you...

- The **hyperref** package generates hyperlinks to the references in the .pdf files.
- The `\autoref{}` command...
  - ① automatically identifies the reference type (section, equation, table, etc.);
  - ② generates a hyperlink with the text **and** number of the reference.

As seen in `\autoref{sec:definitions}`...

- The `\pageref{}` command refers to a page number.
- The **amsmath** package provides the `\eqref{}` command to refer to equations.

# Text Appearance

# Fonts

- By default, all  $\text{\LaTeX}$  documents use the same font, Computer Modern.
- You should choose high-quality and complete fonts (diacritics, great choice of symbols).
- Very few fonts are adapted to maths: Palatino, Times, Lucida (\$) are safe choices.
- In the **hecthes** document class, mathptmx and mathpazo packages are preloaded so you can choose between Times and Palatino fonts.

# Font Attributes

## families

roman	<code>\rmfamily</code>	<code>\textrm{&lt;text&gt;}</code>
fixed width	<code>\ttfamily</code>	<code>\texttt{&lt;text&gt;}</code>
sans serif	<code>\sffamily</code>	<code>\textsf{&lt;text&gt;}</code>

## shapes

upright	<code>\upshape</code>	<code>\textup{&lt;text&gt;}</code>
<i>italic</i>	<code>\itshape</code>	<code>\textit{&lt;text&gt;}</code>
<i>slanted</i>	<code>\slshape</code>	<code>\textsl{&lt;text&gt;}</code>
SMALL CAPS	<code>\scshape</code>	<code>\textsc{&lt;text&gt;}</code>

## series

medium	<code>\mdseries</code>	<code>\textmd{&lt;text&gt;}</code>
<b>bold</b>	<code>\bfseries</code>	<code>\textbf{&lt;text&gt;}</code>

# Font Attributes

<b>families</b>		
roman	<code>\rmfamily</code>	<code>\textrm{&lt;text&gt;}</code>
fixed width	<code>\ttfamily</code>	<code>\texttt{&lt;text&gt;}</code>
sans serif	<code>\sffamily</code>	<code>\textsf{&lt;text&gt;}</code>
<b>shapes</b>		
upright	<code>\upshape</code>	<code>\textup{&lt;text&gt;}</code>
<i>italic</i>	<code>\itshape</code>	<code>\textit{&lt;text&gt;}</code>
<i>slanted</i>	<code>\slshape</code>	<code>\textsl{&lt;text&gt;}</code>

<b>series</b>		
medium	<code>\mdseries</code>	<code>\textmd{&lt;text&gt;}</code>
<b>bold</b>	<code>\bfseries</code>	<code>\textbf{&lt;text&gt;}</code>
applies to all the following text		

# Font Attributes

## families

roman	<code>\rmfamily</code>
fixed width	<code>\ttfamily</code>
sans serif	<code>\sffamily</code>

`\textrm{<text>}`  
`\texttt{<text>}`  
`\textsf{<text>}`

## shapes

upright	<code>\upshape</code>
<i>italic</i>	<code>\itshape</code>
<i>slanted</i>	<code>\slshape</code>
SMALL CAPS	<code>\scshape</code>

`\textup{<text>}`  
`\textit{<text>}`  
`\textsl{<text>}`  
`\textsc{<text>}`

## series

medium	<code>\mdseries</code>
<b>bold</b>	<code>\bfseries</code>

`\textmd{<text>}`  
`\textbf{<text>}`

applies to the text in  
the command

# Italics

When using italics to put *emphasis* on parts of a text, you should use the following semantic command instead:

```
\emph{text}
```

`\emph{<text>}` commands can be nested in one another. Text in italics becomes upright and vice versa.

```
This house lacks a certain  
\emph{je ne sais quoi}\ldots
```

This house lacks a certain *je ne sais quoi*...

```
He said: " \emph{Enough  
\emph{poutine} for the week!}"
```

He said: « *Enough poutine for the week!* »

# Font size

Standard commands	Size
<code>\tiny</code>	tiny
<code>\scriptsize</code>	script size
<code>\footnotesize</code>	footnote size
<code>\small</code>	small
<code>\normalsize</code>	normal size
<code>\large</code>	large
<code>\Large</code>	larger
<code>\LARGE</code>	largest
<code>\huge</code>	huge
<code>\Huge</code>	humongous

Displaying text

# Lists

- Two main types of lists:
  - ① **unordered** with the `itemize` environment
  - ② **ordered** with the `enumerate` environment
- Lists can be nested into one another
- Markers are adapted to up to four nesting levels

# Lists

- Two main types of lists:
  - ① **unordered** with the `itemize` environment
  - ② **ordered** with the `enumerate` environment
- Lists can be nested into one another
- Markers are adapted to up to four nesting levels

```
\begin{itemize}
  \item Two main types of lists :
  \begin{enumerate}
    \item \textbf{unordered} with the \verb=itemize= environment
    \item \textbf{ordered} with the \verb=enumerate= environment
  \end{enumerate}
  \item Lists can be nested into one another
  \item Markers are adapted to up to four nesting levels
\end{itemize}
```

# Lists

- Two main types of lists:
  - ① **unordered** with the `itemize` environment
  - ② **ordered** with the `enumerate` environment
- Lists can be nested into one another
- Markers are adapted to up to four nesting levels

```
\begin{itemize}
  \item Two main types of lists :
  \begin{enumerate}
    \item \textbf{unordered} with the \verb=itemize= environment
    \item \textbf{ordered} with the \verb=enumerate= environment
  \end{enumerate}
  \item Lists can be nested into one another
  \item Markers are adapted to up to four nesting levels
\end{itemize}
```

- A third list type is available: description

# Quotations

## Short Quotes

We use the quote environment to insert a short, one-paragraph quote in our text.

```
\begin{quote}  
  Life is what happens to you while  
  you're busy making other plans.  
  — John Lennon  
\end{quote}
```

*Life is what happens to you while  
you're busy making other plans. –  
John Lennon*

# Quotations

## Long Quotations

We use the quotation environment to insert long quotations.

```
\begin{quotation}  
  I've missed more than 9000 shots in my  
  career. I've lost almost 300 games. 26  
  times I've been trusted to take the game  
  winning shot and missed.  
  
  I've failed over and over and over again  
  in my life. And that is why I succeed.  
  — Michael Jordan  
\end{quotation}
```

*I've missed more than 9000 shots  
in my career. I've lost almost 300  
games. 26 times I've been trusted to  
take the game winning shot and  
missed.*

*I've failed over and over and over  
again in my life. And that is why I  
succeed. – Michael Jordan*

# Footnotes

- A footnote is inserted with the following command:

```
\footnote{text}
```

- The command must immediately follow the annotated text.
- Recommended method:

```
... fera remarquer que Pierre Lasou\footnote{%  
Spécialiste en ressources documentaires} %  
fut une grande aide dans la préparation de ...
```

- Footnote numbering and display are automatically generated.

# Source Code

- To write source code in our text, we use the `verbatim` environment.

```
\begin{verbatim}  
  Text displayed as is in a  
    fixed-width font.  
\end{verbatim}
```

- To write source code inline in our text, we use the `\verb` command. Its syntax is `\verbcsourcec` where *c* can be any character not found in *source*.
- For more thorough inclusions of source code, you should use the **listings** package.

# Source Code

## Example<sup>1</sup> :

```
# ---Writing Your Own Functions (Macros)---  
  
# A good function that just prints.  
mystats <- function(x) {  
  print( mean(x, na.rm = TRUE) )  
  print(   sd(x, na.rm = TRUE) )  
}  
mystats(myvar)  
  
# A function with vector output.  
mystats <- function(x) {  
  mymean <- mean(x, na.rm = TRUE)  
  mysd   <- sd(x, na.rm = TRUE)  
  c(mean = mymean, sd = mysd )  
}  
mystats(myvar)  
myVector <- mystats(myvar)  
myVector
```

# hecthese Document Class

# hecthes Document Class

- Document class made specifically for HEC Montréal's M.Sc. and Ph.D. students;
- Available at <https://ctan.org/pkg/hecthes>;
- Document layout fully complies to the [Guidelines for Writing an Academic Work at a Graduate Level](#);
- Based on the **memoir** document class;
- Homemade commands for title creation and more. . . ;
- New homemade environments;
- You choose a template as a starting point (templates are available once the document class has been installed in a working directory);
- You use separate files for each chapter in your document.
